BUILD GUARD
BUILDING PROTECTOR

You never know when and how will they come, attack and destroy!!! Yes termites and borers can be identified as such terroful creatures we can ever imagine.

Blocking the entrance of termites, repelling this dangerous wood destroying army, at the same time protection of our precious furniture, wardrobes and costly wooden articles must be fundamental priority of every house owner, engineer, and developers at the very initial stage of construction.

To win this war against 'subterranean termites', use of Build guard BG 18, the most advanced soil treatment compound is sure shot formula

Build guard BG 18 WC...the soil treatment concentrate....Latest innovation developed from the house of wood guard, who are known as the experts and pioneers in wood treatment compounds, have come up with this soil treatment formula to deal with termites.

Build guard BG 18... the most useful compound for soil treatment of residential and commercial plots and foundations against termites that has unique property to repel the attack of termites just by its presence in the applied area for long time

Important Features:

1. Latest innovation in soil treatment
2. Very easy to use on site.
3. Water dilutable formula
4. Better performance at recommended dilution dose
5. More coverage
6. Non flammable
7. Not volatiles easily
8. Though not intended for use on vegetation, does not affect adversely on soil and plants
9. More effective. 2 times better performance.
10. Simple to handle and store

How to use:

Before using Build guard BG 18 always make sure to shake the container well before for 30 seconds Mix this brown colored viscous concentrate with maximum 20 liters of water and stir well.

While stirring color of the solution changes from brown to whitish.

Once the solution is ready, use it in following ways

Only Complete Solution to Building Protection **BUILD GUARD**

How Do I Control Termites In My Building With **BUILD GUARD...?**

1. Start by treating along sides of foundation and bottom side of construction. Make sure to treat and saturate the area up to 40-50 centimeters height. Dig holes in the soil, alongside of construction up to 45 centimeters and pour the diluted solution in.
2. Don't forget to treat the soil with Build guard BG 18 solution that is to be used for covering the holes dug.
3. Use of Build guard BG 18 is must before any kind of concreting like column, plinth, flooring or any structure that is going to come in contact with soil.
Cover the entire soil surface before concreting with Build guard BG 18 in such a way that the Build guard BG 18 should penetrate about 50-60 centimeters below soil.
4. Confirm application of Build guard BG 18 underground, where pipes (water, sewage, wastewater etc) are laid.
5. If present, the point of contact where sewage pipe opening comes in contact with ground must also be treated with Build guard BG 18.
6. For treatment in concrete, drill the concrete surface near plinth wall up to 30 centimeters with diameter of hole around 10-12 mm and pour Advanced Build Guard.

7. Use Build guard BG 18 alongside of building, foundation.
8. Not intended for use on plants and agricultural lands and water sources.

Precautions:

1. Store container tightly closed in cool and dry area, away from direct sunlight
2. Keep out of reach of children and pets
3. Always wear PVC gloves, proper eye and body protection.
4. Always wash the equipments with plenty of soap and water after treatment
5. not intended for use on plants and agricultural lands and water sources

NOTE: THIS product is neither insecticide nor pesticide to be used only for preserving construction sites. Contents: cresol, phenol, TD derivatives, dispersing agents, solvents, emulsifiers
