

# WOOD GUARD

Timber &  
Plywood Tonic

Advanced  
Revolution  
in **WOOD**  
Protection  
Technology

**Powerful Termite Repellent since 25 Years**

## Have You Heard of Wood Cancer...?

You may not have heard... but you have surely seen it... almost at every place where there is wood open there is an attack from pests such as Termites, Wood Borers, Fungi & others. They are tiny... minute... even microscopic but when they invade wood work their moto is total irreparable destruction. The aesthetics of your wood work does not impress them. They act mercilessly, distraction has no limits.

Within no time can reduce a strong pillar of wood to a heap of powdery junk. This is **WOOD CANCER**... as old as wood itself... As fatal as cancer itself.

But fortunately wood cancer has a solution equally Aggressive. Merciless... Effective. **WOOD GUARD** is the solution. You cannot hide your wood work from pests... but you can always protect with **WOOD GUARD**.

## Have You Heard of Wood Guard... The only Solution to Wood Cancer...?

### **WOOD GUARD** India's First Oil Based Wood Preservative

Is a concentrated wood preservative oil ready to use any where on any type of wood... Plywood, Plyboard, Teak, Sissoo, Deodar, Rosewood, Champ etc... It is dark brown to see but transparent liquid oil with sp gr. 0.910 and has a typical phenolic smell.

**It contains Cresole, Carbolic acid, Nephthalene. T. D. Derivatives, Hydrocarbons and other low density oils...**

It is backed by a decade strong research history on the life cycles of wood insects & pesticide action. It stops infections like White ants,

Silver fish, Wood borers etc. It decreases absorption of water and humidity thus keeping wood dampproof & dry for a long time & adding extra years to its life. It does not form any film on wood. This helps in getting good surface binding. This oil penetrates up to 03 mm, below surface. It does not oxidize thereby preserving the oil property. After complete absorption the wood surface can be painted or polished.

**WOOD GUARD** saves up to 15% in primers and oil paints. One liter of **WOOD GUARD** covers approx. 150sq.ft.

### **Certification form Institute of Wood Science & Technology, Bangalore.**

The World of Science Stands for impartiality and truth. It is a matter of great pride and privilege regarding **WOOD GUARD** that it stood up to the mark against challenging scientific tests conducted by Institute of Wood Scientific & Technology Bangalore.

**WOOD GUARD** was adjudged to be 5 to 6 times more powerful in its preventive abilities than the destructive powers of **WOOD GUARD** comes across as a significant agent with a major role to play in the environment protection policy and program along with wood preservation technology...

### **Terminates Termites...**

Their attack is fatal. Their attitude cruel. They are and microscopic. Their distractive powers can't be underestimated & ignored. Until one fine day, your entire furniture is brought down to powder.....

### **WOOD GUARD, Guards Wood**

It knows the menace be it bottom or surface... It repels them for sure be they one or all & cares the atmosphere.

### **The Applause from Scientific Community.**

An extract from the Test Report by Institute of Wood Science and Technology Indian Council of Forestry Research and Education Bangalore -560 003

*Sample of "WOOD GUARD" solution was tested for its efficacy as wood preservative on test sticks of rubber wood, after treating them in accordance with the direction given by the manufacture's leaflet.*

- Treated wood showed resistance to Termites (Odontotermessps.) during the testing period of six months while, untreated wood was completely destroyed.
- Simple sock treatment of the **WOOD GUARD** solution showed 10% loss of wood in the case of treated wood, while untreated wood registered a loss of 40-60% to two wood totters (viz. Coriolis versicolor L.ex. FRI 165, Polyporus hirsutus ex. Fr. FRI 715 while rot: Polyporus melia undrew FRI 836 and Polyporus palustris B. Ex. C, FRI 528 brown rot).

### **Grueling Tests Gallantly with Stood by WOOD GUARD**

**WOOD GUARD** Preservative was tested for ( its efficacy against termites as per I.S.4833-1968 "Method for the field-testing of preservatives in wood species"

Rubber wood test panels size 3.81 x 3.81 x 30.5 cms were in stalled in "Test yard" in treated and untreated conditions. In case of treated panels two sets of specimens were brush coated with **WOOD GUARD** solution, in single and double coating as given in the leaflet.

All the untreated wooden panels were destroyed within 2 ½ months. Where as both single coated and double coated rubber wood panels are completely sound even after 6 months and likely to be so for many more months.
